'rs and Botox'

fillers in her cheeks. Her chin was more prominent before so I believe she could have had fillers to shape her face. Her eyebrows are a lot more curved so I also think she's had Botox in her forehead."

In 2011, Frankie, 27, admitted she would consider having some work done, saying: "I wouldn't rule out cosmetic surgery. I always joke and say that I'm not going to grow old gracefully."

In 2012, she also sparked speculation that she'd had a boob job after appearing to have a larger chest.

MEGAN MCKENNA

'Her nose & brows have more shape'

Despite being a lover of fake tan, false lashes and hair extensions, reality star Megan McKenna revealed earlier this year that the only cosmetic procedure she'd had was lip filler, saying she didn't like "the fake look." She said: "The only surgery I've had is on my lips. I'd like a nose job, though! It's too big."

But surgeon Mark believes the *TOWIE* star, 24, has had far more done to her face than just her lips and thinks she's had a nose job, lip fillers, plus Botox on her forehead, cheeks and chin.

Mark says: "Megan's nose has been given more shape, it's more projected and turned up at the tip compared to when she was younger. Her nose is more pointed now and you can see more of her nostrils. I imagine she's also had filler around the tip of her nose to change the shape."

"She also has a much more defined shape to her eyebrows; they're higher too – a signal she may have turned to Botox here. I believe Megan has also had Botox around her mouth, forehead, cheekbones and chin to help give a slimmer appearance."
