

UNG?

These 20-somethings' looks have changed dramatically. We reveal what they've admitted to – and asked top cosmetic surgeon Mark Ho-Asjoe for his verdict

MARNIE SIMPSON:

ADMITS LIP FILLER ADDICTION

She prided herself on being a "natural beauty" when she shot to fame on *Geordie Shore* in 2013, but since then Marnie Simpson has had two nose jobs, two breast operations and has admitted to being "addicted" to lip fillers. Last month the star, 24 – who has said in the past that she gets her lips done every four months – revealed that she wants to get her "pointy" chin fixed next. And surgeon Mark believes Marnie may have had other procedures in her quest for "perfection."

MARK'S VERDICT: "I think Marnie's had work done to make her cheekbones more pronounced. If you clench your teeth and feel the muscle on your jaw tighten, that's where I think she's had Botox injected. It makes the muscle become inactive and your face immediately looks slimmer.

"I also believe she's had filler in her chin to make it more defined. Because of the curvature of her brows I'd say she's had Botox around her eyes, too. She looks like an entirely new person and that's such a shame. Some people might want a tiny bit of filler to put their features in proportion, but this overblown look is too extreme."

CHLOE FERRY:

SAYS SHE HATES NATURAL LOOK

She's previously admitted to having a nose job, lip fillers, Botox and veneers, but last week Chloe Ferry revealed she wants to have a second nose op after being unhappy with the results of her first.

The 21-year-old said: "The way I pictured my nose in my head is not what I feel now. I feel like I need another one and I am going to get it. I didn't rush into the first, but it's not what I wanted."

The reality star has also blasted her teenage pre-surgery face as "ugly" saying: "I don't have any regrets. I feel like I look a lot better now. I don't like natural."

MARK'S VERDICT: "There was nothing wrong with Chloe's nose in the first place! Her face appears much rounder now, which I suspect is because she's had so much filler in her cheeks. Her lips have been overfilled with filler, and her mouth looks wider so she might even have had a non-surgical thread lift to change the shape of her mouth. She's a beautiful girl and is only 21 – she really didn't need to have any cosmetic procedures."
